

ALEJANDRO RUBIO PLANA

Game Software Engineer | C++ | Multiplayer Networking | Systems

Castelldefels, Barcelona • +34 665 417 079 • alexrubioplana14@gmail.com • [Portfolio](#)

PROFESSIONAL SUMMARY

Software engineer focused on game development, with experience in gameplay programming and a strong focus on C++ systems and multiplayer networking. Interested in game architecture, performance and building reliable systems from the ground up.

PROFESSIONAL EXPERIENCE

Junior Gameplay Programmer | The Breach Studios

July 2025 – June 2026 (11 Months) | Unannounced Prototype (Under NDA)

- Developed a dynamic multi-camera management system in Unity/C#, including smooth runtime blending, transitions and contextual zoom.
- Built an internal map generation and serialization tool combining procedural asset spawning and manual placement through custom ScriptableObjects.
- Collaborated directly with the Technical Lead to implement gameplay features independently within an Agile production environment using Fibery and Gitea.
- Contributed to map generation and asset-loading workflows used to validate the project's replayability-focused USP.

PERSONAL PROJECTS

Lyra | Character Programmer & Producer | Unreal Engine, C++ (Best TFG ENTI DemoDay 2026)

- Developed core character controllers and fluid movement systems, with decoupled interfaces connecting player and companion dragon systems.
- Implemented a custom, extensible Finite State Machine to manage the player character's core lifecycle, eliminating cascading conditionals and ensuring clean state encapsulation.
- Coordinated a seven-person multidisciplinary team as Producer, managing roadmaps, sprint planning and cross-discipline development.

NetworkMiddleware | Solo Developer | C++20, Azure, TDD

- Designed an engine-agnostic, server-authoritative multiplayer networking layer for MOBA architectures running at 100 Hz.
- Implemented custom binary serialization, delta compression, client-side prediction and low-level UDP networking using POSIX sendmmsg.
- Built 254 automated unit/integration tests and automated CI/CD pipelines with GitHub Actions and Azure.

SKILLS & TOOLS

- **Tech & Architecture:** C++ 20, C#, SFML, Unreal Engine 5, Unity, FSMs, Client-Server Networking, UDP, Delta Compression, Linux POSIX, Data Structures, SOLID/GRASP, CMake, Google Test, TDD.
- **Tools:** Git, Perforce, Docker, GitHub Actions, Azure, Jira, Rider | Spanish & Catalan (native), English.
